WallGoldfinger Furniture stands above for its ability to source beautiful veneer finished to perfection. Natural veneers from around the world are carefully selected, fit and finished to perfection.

Choose the beauty of veneers, made durable through our expert finishing process, to create a tabletop style that will be more than a masterpiece; it will be a conversation piece.

Pair our veneers with inlays, edges, metal, stone, glass, faux leather and more to further complete your unique look. Ask us what materials are right for your project and for your budget.

PLASTIC LAMINATE

Designer White

Park Elm

Colombian Walnut

Skyline Walnut

Ebony Recon

Enjoy the beauty of a wood finish and the durability of plastic with these Wilsonart laminate finishes. Plastic laminate is a man-made decorative material applied by WallGoldfinger Furniture craftspeople to core materials. Plastic laminates offer an easy to clean surface and often more affordable alternative to wood veneers. Plastic laminates sometimes even include graining and texture reminiscent of wood. Pair a plastic laminate with WallGoldfinger Furniture's

high-quality construction and other materials, such as metal, for a top-of-the-line look.

GLASS

Polo Blue

Wall Street

Chantilly Lace

Silver Fox

Iron

Twilight Zone

WallGoldfinger Furniture incorporates glass into corporate furniture through unsurpassed expertise, design innovation and collaborations with leading glass suppliers. Our design engineers' precise drawings guide glass vendors on exact cut and polish specifications. Your glass is then carefully integrated with other furniture materials, such as veneers and metals. And WallGoldfinger Furniture stands above when it comes to integrating technology with glass surfaces, including glass power and data hatch lids.

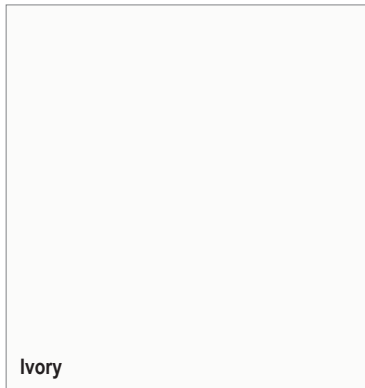

Options shown are low iron. When you're looking to add the modern touch of glass to your table, reception desk and more, turn to WallGoldfinger Furniture and its expert team.

CAST ACRYLIC

Ivory

Lattice

New Leaf

Stormy

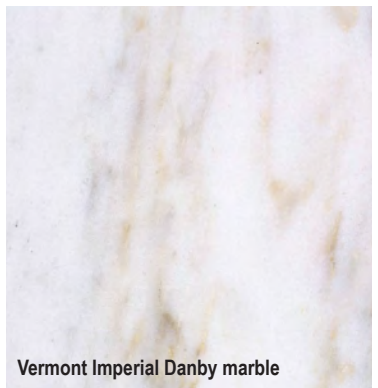

LIGHTBLOCKS cast acrylic resin provides a long-lasting, stain-resistant tabletop surface and up-to-date look for today's business people. Sometimes back lit or used for other solid surface applications, such as reception desks and dining tables, resin is a modern, lighter weight alternative to back-painted glass.

WallGoldfinger Furniture is experienced in working with resin to provide a carefree surface for the most

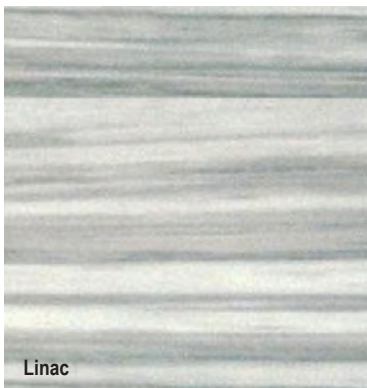

demanding work environments, as well as incorporating resin with other materials.

STONE

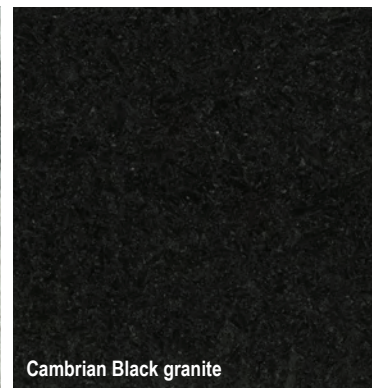

Vermont Imperial Danby marble

Linac

Pearl Gray marble

Cambrian Black granite

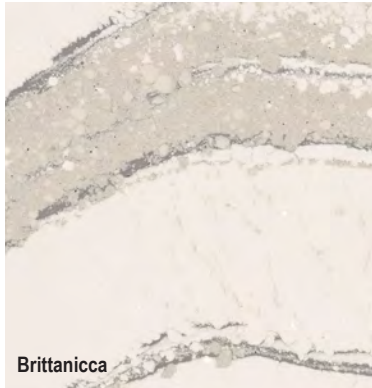

WallGoldfinger Furniture sources marble and granite from around the world, and around Vermont. Our Vermont sales office is located just 60 miles from Vermont Quarries Corp., home of the famed Vermont Danby marble. Vermont is additionally renowned for its bustling granite industry.

When you're looking to make a statement regarding the strength, integrity and reliability of your business, WallGoldfinger Furniture will work with you to create a full or partial stone tabletop.

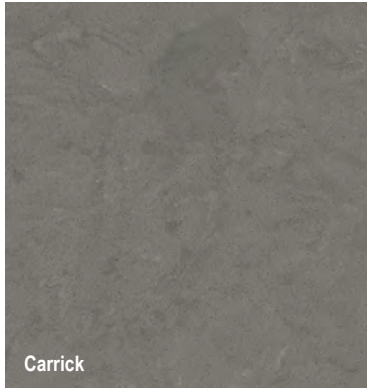

Using state-of-the-art CNC and laser jet cutting methods, we'll precisely fit other project materials with your stone, melding edge details and inlays, wood veneers, technology needs and more into a stunning piece created exclusively for you.

ENGINEERED QUARTZ

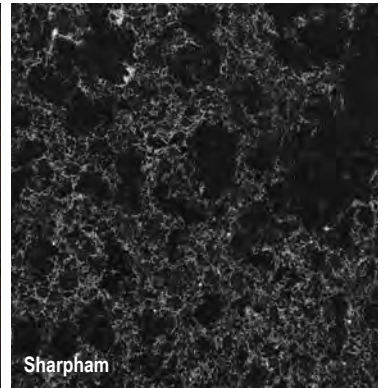

Brittanicca

Carrick

Wellington

Sharpam

Engineered quartz brings the best of nature and science together to create a surface with the strength and look of stone while providing greater scratch, stain and corrosion resistance. A combination of mostly stone and a small amount of pigment and resin, engineered quartz is available in unlimited color options, including this WallGoldfinger Furniture standard palette from Cambria. Cambria engineered quartz is 93 percent pure quartz and thought to be more durable than granite. It is nonporous and nonabsorbent, gives off zero emissions and no radon, and is easy to clean.

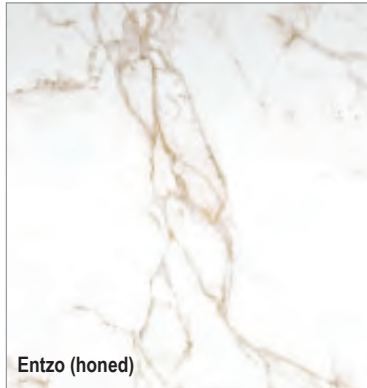

And just like with all-natural stone, WallGoldfinger Furniture uses state-of-the art CNC cutting to precisely fit other project materials around engineered quartz surfaces for a finished look that is sure to wow.

PORCELAIN

Glacier (polished)

Entzo (honed)

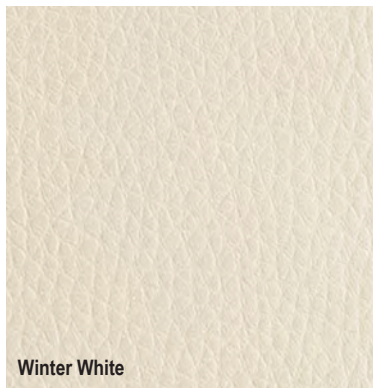

Sterling (honed)

Dekton ultracompact surfaces provide a lighter weight alternative to stone. These lighter weight panels are perfect for tables that reconfigure and move, such as WallGoldfinger's Summit line of tilt-top conference tables. Created with sinterized particle technology that creates an accelerated version of metamorphic change, the result is zero porosity and a lack of defects that cause tension or weak spots. The product is also resistant to UV light, scratches, stains, heat, abrasion and even extreme cold.

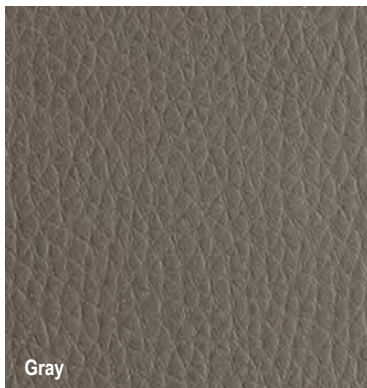

Available in sizes up to 4.7x10.4 feet in a variety of looks and colors, porcelain is proving to be the latest trend in tabletop and credenza top design. For a lightweight alternative with the look of stone, ask WallGoldfinger Furniture about porcelain for your next project.

FAUX LEATHER

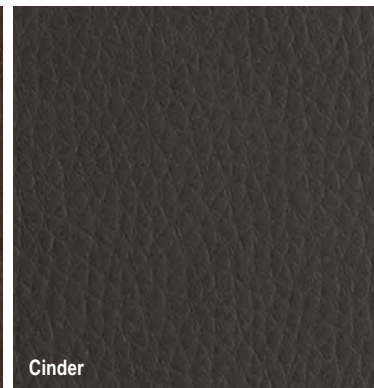

Winter White

Gray

Hershey

Cinder

From soft-touch writing surfaces for even the most discriminating executives to leather wrapped pedestals on modern tables, leather can provide a look and texture unlike any other material.

WallGoldfinger pioneered the use of synthetic Majilite leather in corporate furniture using a nylon fiber matrix that is manufactured in the United States, does not contain any PVC or plasticizers, and does not emit toxic gases.

Add the look of leather to your next project with the help of WallGoldfinger Furniture.
